# (https://profile.intra.42.fr/searches) SCALE FOR PROJECT INIT (/PROJECTS/INIT)

You should evaluate 1 student in this team

Git repository

vogsphere@vogsphere-2.unit.ua:intra/2018/activities/init/

### Introduction

Please respect the following rules:

- Remain polite, courteous, respectful and constructive throughout the evaluation process. The well-being of the community depends on it.
- Identify with the person (or the group) graded the eventual dysfunctions of the work. Take the time to discuss and debate the problems you have identified.
- You must consider that there might be some difference in how your peers might have understood the project's instructions and the scope of its functionalities. Always keep an open mind and grade him/her as honestly as possible. The pedagogy is valid only if the peer-evaluation is conducted seriously.

### **Guidelines**

- Only grade the work that is in the student or group's GiT repository.
- Double-check that the GiT repository belongs to the student or the group. Ensure that the work is for the relevant project and also check that "git clone" is used in an empty folder.
- Check carefully that no malicious aliases was used to fool you and make you evaluate something other than the content of the official repository.
- To avoid any surprises, carefully check that both the evaluator

and the evaluated students have reviewed the possible scripts used to facilitate the grading.

- If the evaluated student has not completed that particular project yet, it is mandatory for this student to read the entire subject prior to starting the defence.
- Use the flags available on this scale to signal an empty repository, non-functioning program, a norm error, cheating etc. In these cases, the grading is over and the final grade is 0 (or -42 in case of cheating). However, with the exception of cheating, you are encouraged to continue to discuss your work (even if you have not finished it) in order to identify any issues that may have caused this failure and avoid repeating the same mistake in the future.

Part 1 - Follow Slash 16 around the You have to follow us in the whole world	e world
The student has followed Slash 16 on Linkedin, Facebook and Twitte	er
The student has followed Slash 16 on Linkedin, Facebook and Twitter  The student has followed Slash 16 on Linkedin, Facebook and Twitter	er

### Part 2 - Network

Evaluation of Part 2 - Network

Get the list of the network interfaces of the machine without displaying any detail

Check that the answer file contains the command which lists the names of the interfaces of the machine and no other information. For instance:

lo0 gif0 stf0 en0 en1 en2 en3 p2p0 awdl0 bridge0 \$>		
∀es	×No	
Identify and display the Ethernet interface characteristics		
Check that the answer file contains the command which identifies and displays the specifications of the Ethernet interface. For instance:		
\$>`cat 02` en0: flags=XXXX mtu 1500 options=10b ether 00:00:00:00:000 inet 42.42.42.42 netmask 0xffffff00 broadcast 42.42.42.255 nd6 options=1 media: autoselect (1000baseT) status: active \$>		
⊗ Yes	imesNo	
Identify the MAC address of the Wi-Fi card		
Check that the answer file contains the command which identifies and diplays the MAC address of the wi-fi board. For instance:		
\$>`cat 03` xxn: flags=XXXX ether 00:00:00:00:00 \$>		
	×N₀	

### Identifyy the default gateway in the routing table

\$>`cat 01`

Check that the answer file contains the command which identifies and displays the default gateway in the routing table. For instance:

<b>\$&gt;</b>	
⊗ Yes	×N₀
Identify the IP address of the DNS server whi	ch answers to slash16.org
Check that the answer file contains the command wh	
identifies and displays the IP address of the DNS serv	ver. For instance:
\$>`cat 05`	
Server: 10.51.1.42	
Address: 10.51.1.42	
Non-authoritative answer:	
Name:slash 16.org	
Address: 195.154.52.157	
Name:slash 16.org	
Address: 195.154.52.158	
<b>\$&gt;</b>	
✓ Yes	×No
Get the complete path of the file that contains	the IP address of the DNS server you're using
Check that the answer file contains the complete path which the IP address of the used DNS server is written	
\$>cat 05	
/etc/resolv.conf	
\$>	
	imesNo
Query an external DNS server on the same d	omain name (ex, google 8.8.8.8)

\$>`cat 07` Server:8.8.8.8

\$>sh 04

default 42.42.42.42 UGSc 19 16 en0

Address: 8.8.8.8

Check that the answer file contains the command which

use another DNS server to solve the same domain name. For instance:

Name:slash16.org Address: 195.154.52.158 \$>		
	⊗ Yes	XN₀
Find the provider of sla	sh16.org	
Check that student's answer	r in the file is AWS (Amazon Web Services).	
		XN₀
Find the external IP of 4	12.fr	
•	u his approach and explain it. r in the file is 163.172.250.12 and/or 163.172.2	250.11.
		XN₀
Identify the network de	evices between your computer and the sla	sh16.org domain
	contains the command which different network devices between o.org.	
1 10.8.0.1 (10.8.0.1) 5.80 2 10.42.1.254 (10.42.1.25 3 nat-1.42.fr (10.60.1.11) 2 4 dc3.42.fr (62.210.35.1) 5 195.154.1.174 (195.154 6 a9k2-45x-s44-2.dc3.po 7 195.154.1.179 (195.154	95.154.52.158), 64 hops max, 52 byte packets 99 ms 6.087 ms 3.124 ms 54) 6.005 ms 13.668 ms 7.037 ms 7.530 ms 3.379 ms 9.966 ms 7.100 ms 7.587 ms 5.160 ms 1.174) 57.350 ms 168.093 ms 8.906 ms 9.946 ms 168.093 ms 8.906 ms 1.179) 4.077 ms 46.904 ms 3.883 ms 154.52.158) 5.699 ms 6.034 ms 7.632 ms	

 $\times_{\mathsf{No}}$ 

✓ Yes

Non-authoritative answer:

Address: 195.154.52.157

Name:slash16.org

Use the output of the previous command to find the name and the IP address of the device that makes the link between you (local network) and the outside world.	
Check that student's answer in the file is the NAT server.	
✓ Yes	×No
Check that the server with the 10.51.1.253 IP address is r	eachable from your computer.
Check that the answer file contains the command which displays if the IP address is reachable or not. For instance:	
\$>`cat 12` 64 bytes from 10.51.1.253: icmp_seq=0 ttl=62 time=40.663 ms 64 bytes from 10.51.1.253: icmp_seq=1 ttl=62 time=5.024 ms \$>	
✓ Yes	×No
Use the Reverse DNS to find out the name of the server li	nked to the 10.51.1.81 IP address
Check that student's answer in the file is Idap-proxy.42.fr	
✓ Yes	×No
What file contains the local DNS entries?	
Check that student's answer in the file is /etc/hosts.	
	XNo
Make the intra.42.fr address reroute to 46.19.122.85	
Ask the student to show you his approach and explain it.  Check that student's answer in the file is '46.19.122.85 intra.42.fr'.	
✓ Yes	×No

# Part 3 - System

what file can you find the installed version of your Debian	?
heck that student's answer in the file is /etc/debian_version.	
	XN₀
hat command can you use to rename your system?	
heck that the answer file contains the command which ename the system. For instance:	
>`cat 02` nachine.old.name.local >	
	XNo
Vhat file has to be modified to make it permanent?	
Check that student's answer in the file is /etc/hostname.	
⊗ Yes	imesNo
Vhat command gives your system was last booted?	
Check that the answer file contains the command which ives the time since the last boot of the system. For instance:	
5>`cat 04` 7:44 up 1 day, 6:45, 4 users, load averages: 1.33 1.42 1.40 5>	
⊗ Yes	×N₀

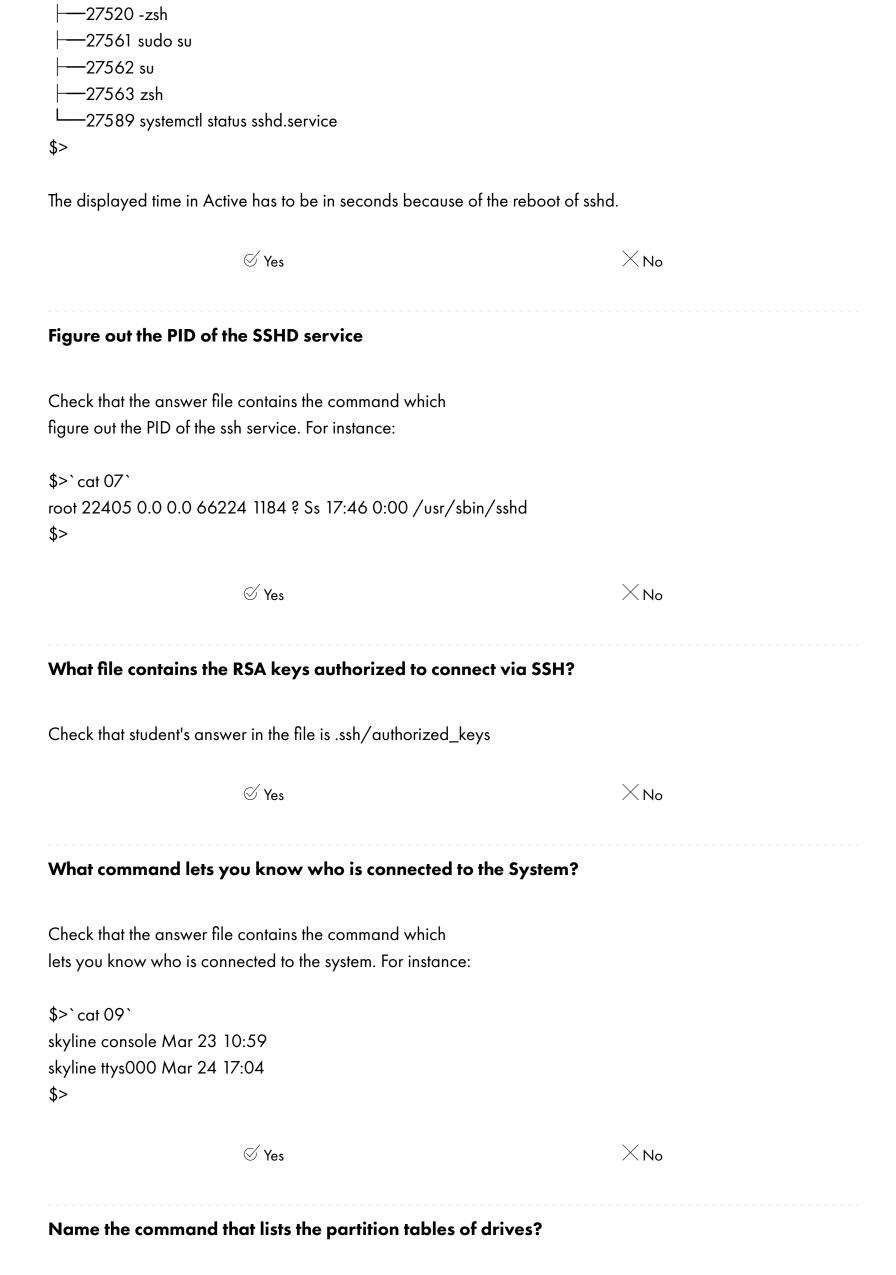

\$>`cat 05`

Check that the answer file contains the command which

determines the state of the SSH service. For instance with init.d :

openssh-daemon (pid 22405) is running \$>
Or with service:
\$>`cat 05` • ssh.service - OpenBSD Secure Shell server Loaded: loaded (/lib/systemd/system/ssh.service; enabled) Active: active (running) since Fri 2016-12-02 18:42:05 CET; 1 months 0 days ago Main PID: 13106 (sshd) CGroup: /system.slice/ssh.service
Name the command that reboots it.
Check that the answer file contains the command which reboot the SSH service. For instance with init.d:
\$>`cat 06` Stopping sshd: [ OK ] Starting sshd: [ OK ] \$>
Or with service:
\$>`cat 06` \$> service sshd status  • ssh.service - OpenBSD Secure Shell server  Loaded: loaded (/lib/systemd/system/ssh.service; enabled)  Active: active (running) since Fri 2016-12-02 18:42:05 CET; 10s ago  Main PID: 13106 (sshd)  CGroup: /system.slice/ssh.service

├—27519 sshd: skyline@pts/0

Check that the answer file contains the command which lists the partition tables of drives. For instance:

\$>`cat 10`

Disk /dev/sdb: 2000.4 GB, 2000398934016 bytes 255 heads, 63 sectors/track, 243201 cylinders Units = cylinders of 16065 \* 512 = 8225280 bytes Sector size (logical/physical): 512 bytes / 512 bytes I/O size (minimum/optimal): 512 bytes / 512 bytes

Disk identifier: 0x0000000

\$>

# Name the command that displays the available the space left and used on the system in an humanly understandable way

Check that the answer file contains the command which displays the available space left and used on the system in an humanly understandable way. For instance:

\$>`cat 11`

Filesystem Size Used Avail Use% Mounted on /dev/xvda2 7.8G 1.2G 6.3G 16% / udev 10M 0 10M 0% /dev tmpfs 200M 4.2M 196M 3% /run tmpfs 500M 0 500M 0% /dev/shm tmpfs 5.0M 0 5.0M 0% /run/lock tmpfs 500M 0 500M 0% /sys/fs/cgroup \$>

igotimes Yes igwedge No

# Figure out the exact size of each folder of /var in a humanly understandable way followed by the path of it.

Check that the answer file contains the command which displays the exact size of each folders of /var in a humanly understandable way followed by the path of it. For instance:

\$>`cat 12`
4.0K /var/opt
864K /var/spool
1.3M /var/log
111M /var/lib

124M /var/cache
4.0K /var/local
8.0K /var/mail
1.1M /var/backups
4.0K /var/tmp
238M /var
\$>

arphi Yes imes No

#### Name the command that find, in real time, currently running processes

Check that the answer file contains the command which displays running processes in real time.

For instance:

\$>`cat 13`

Tasks: 58 total, 1 running, 57 sleeping, 0 stopped, 0 zombie

%Cpu(s): 0.0 us, 0.0 sy, 0.0 ni, 100.0 id, 0.0 wa, 0.0 hi, 0.0 si, 0.0 st KiB Mem: 1022952 total, 359176 used, 663776 free, 168200 buffers

KiB Swap: 0 total, 0 used, 0 free. 86924 cached Mem

PID USER PR NI VIRT RES SHR S %CPU %MEM TIME+ COMMAND

1 root 20 0 28740 4760 3064 S 0.0 0.5 0:03.28 systemd

2 root 20 0 0 0 0 S 0.0 0.0 0:00.00 kthreadd

3 root 20 0 0 0 0 S 0.0 0.0 0:00.02 ksoftirgd/0

5 root 0 -20 0 0 0 S 0.0 0.0 0:00.00 kworker/0:0H

\$>

#### Run the tail -f /var/log/syslog command in background

Check that the answer file contains the command which runs the command `tail -f /var/log/syslog` in background For instance:

\$>`cat 14`

[1] 2660

Mar 25 06:25:03 rsyslogd: [origin software="rsyslogd" swVersion="8.4.2" x-pid="330" x-

info="http://www.rsyslog.com"] rsyslogd was HUPed

Mar 25 07:17:01 CRON[2601]: (root) CMD (cd / && run-parts --report /etc/cron.hourly)

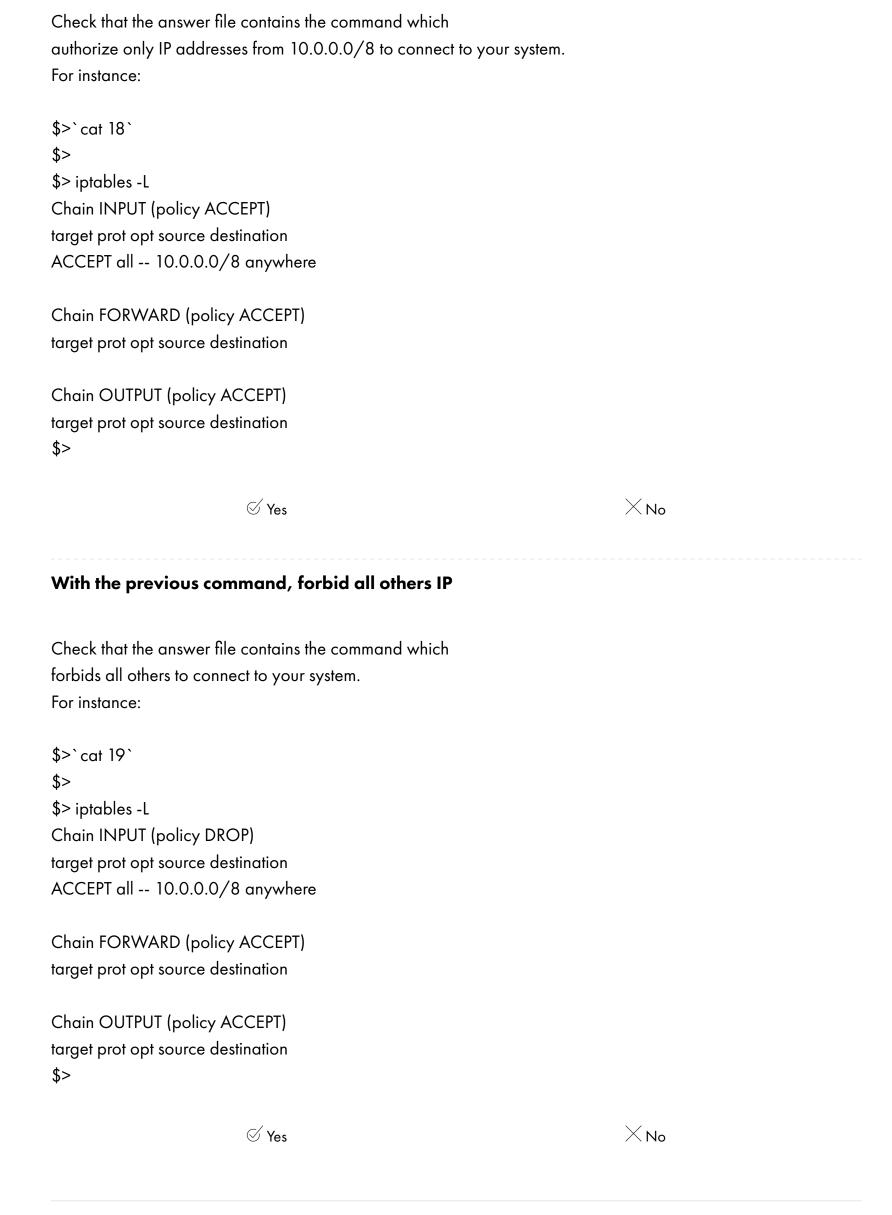

Mar 25 08:17:01 CRON[2656]: (root) CMD (cd / && run-parts --report /etc/cron.hourly)

\$>

\$>`cat 17`
Chain INPUT (policy ACCEPT)
target prot opt source destination

Chain FORWARD (policy ACCEPT) target prot opt source destination

Chain OUTPUT (policy ACCEPT) target prot opt source destination \$>

#### Write a script which displays only the login, UID and Path of each entry of the /etc/passwd file

Check that the script displays only the login, UID and Path of each entry of the /etc/passwd file.

For instance:

\$>sh 1

root:0:/bin/bash

daemon:1:/usr/sbin/nologin

bin:2:/usr/sbin/nologin

sys:3:/usr/sbin/nologin

sync:4:/bin/sync

games:5:/usr/sbin/nologin

man:6:/usr/sbin/nologin

lp:7:/usr/sbin/nologin

mail:8:/usr/sbin/nologin

news:9:/usr/sbin/nologin

uucp:10:/usr/sbin/nologin

proxy: 13:/usr/sbin/nologin

www-data:33:/usr/sbin/nologin

backup:34:/usr/sbin/nologin

list:38:/usr/sbin/nologin

irc:39:/usr/sbin/nologin

gnats:41:/usr/sbin/nologin

nobody:65534:/usr/sbin/nologin
